Publishing SCU journals

ePublications@SCU also provides a journal publishing platform that combines submission management and peer-review tools. For more information, please contact epubs@scu.edu.au

How do I make my research work available through the repository?

Repository staff will be delighted to include your publications in ePublications@SCU. We offer a ‘do it for you’ service, so all we require is a list of your publications or curriculum vitae. It is our aim to provide open access to the full text of as many publications as possible, and the percentage of full text items in ePublications@SCU continues to grow. Repository staff check copyright compliance for all publications submitted and, where possible, attach a pdf copy of publications to the citation record.

ePublications@SCU help

ePublications@SCU staff can help you:

- Add your publications to the SCU repository
- Create a Personal Researcher Page
- Ensure copyright compliance
- Scan material that is not currently in electronic format
- Create an electronic journal
- Arrange information sessions for staff in your school or research centre
What is ePublications@SCU?
ePublications@SCU is a digital repository managed by Southern Cross University Library. Its goal is to capture and preserve the intellectual output of Southern Cross University authors and researchers, and to increase visibility and impact through open access to researchers around the world. While we aim to provide the full text for as many publications as possible, copyright regulations dictate which papers we can make available. This means that some items in the repository appear as citations only. You can explore the ePublications@SCU website at: http://epubs.scu.edu.au/

What materials can be contributed?
The repository is intended to include a diverse range of research and scholarly materials. Examples of eligible research outputs include:

- Journal articles (including pre-prints and post-prints)
- Conference publications
- Reports
- Theses
- Books and book chapters
- Creative works

As deposits are intended to be permanent contributions to the repository, works that are in progress/in press or ephemeral in nature are not recommended for contribution.

What are the benefits of having your work in ePublications@SCU?

- Your research will be more widely accessible, leading to greater visibility and impact.
- Records in ePublications@SCU will be indexed by the National Library of Australia Trove (http://trove.nla.gov.au) and the OCLC Digital Gateway Worldcat (http://www.worldcat.org)
- Records in the repository will also be found through search engines such as Google Scholar.
- Speedier distribution of your research and wider exposure will potentially lead to earlier and increased citation of your work.
- Sharing your research with ease; ‘Tell a colleague’ functionality; RSS feeds and automatic email notifications provide auto-generated reports of newly published records.
- Each month you will be emailed the full-text download counts for your works in the repository.
- Your research is stored in a central, searchable database, rather than being distributed across a range of personal or publisher web sites.
- Links created to the publisher version of journal articles
- Ensures long-term preservation of your digital materials and provides a long-term stable link for each paper; every record is assigned a unique, persistent URL.
- Provides easy access to your works for students.
- Contributes to the showcasing of SCU research and highlights the research output of your school, centre or administrative unit.

Personal researcher pages

Personal Researcher Pages are a great alternative to academics developing their own personal web pages. These pages can contain your complete bibliography, links to papers where possible, your photograph, CV, a summary of your research interests, etc. Library staff can create these pages for you.

Examples can be viewed at the Personal Researcher Gallery: http://epubs.scu.edu.au/sw_gallery.html
